To find a list of available hotels in Meghalaya for your travel dates (August 10-17), I would typically perform a search using a travel booking platform or hotel aggregator. However, as an AI, I don't have real-time access to external databases or booking systems.

Here's how you can find the information:

1. **Use Hotel Booking Sites:** Websites like Booking.com, Expedia, or Agoda can show you a list of available hotels, along with prices and user reviews. You can filter by location, price range, and amenities.
2. **Direct Hotel Searches:** Visit the websites of hotels you're interested in, such as Hotel Ivy Green, Hotel Mystic Resort, or The Meghalaya Retreat, to check their availability directly.
3. **Local Tourism Websites:** Check the official Meghalaya Tourism website or local travel portals for hotel listings.
4. **Travel Agencies:** Contact local travel agencies in Meghalaya for personalized assistance in booking accommodations.

Remember to compare prices, read reviews, and consider the hotel's proximity to the attractions you plan to visit. Also, keep in mind that due to the region's popularity and natural beauty, it's advisable to book in advance, especially during peak tourist seasons.

If you need assistance with understanding the features of a hotel or deciphering reviews, feel free to ask!
